

Features

+ Responsive Modern Design

+ No API Integrations

+ 55-Second Setup

+ No Coding Necessary

1. Update Browser Icon & Title

Give your order form a more custom feel. Easily update your browser meta title and icon from the simple Spiffy form builder.

2. Auto-Recognize Credit Card Type

No need for your customers to specify their credit card type when filling out an order form. Spiffy will recognize their card type as they enter their card number.

3. Big Payment Option Buttons

Spiffy prominently displays your payment options to make them easy to select from mobile devices. No more little radio buttons!

4. Auto-Fill Shipping Information

Don't make your customers fill out unnecessary information. Spiffy will auto-fill their *shipping information* as they fill out their billing information. If their shipping info is different they'll simply click *Change Shipping Address*.

5. Secure Transaction Notice

All Infusionsoft transactions are encrypted and secure, but we figure, why not create some confidence and peace of mind by letting your customers know their information is secure.

The screenshot shows a web browser window with the URL <https://ob123.infusionsoft.com/app/orderForms/thinktank-registratozozzzvvtvvv>. The form is titled "Titans Thinktank BBA Alumni Registration" and has a banner stating "Only 3 spots left!".

1. Update Browser Icon & Title: The browser tab title is "Sign Up for Thinktank".

2. Auto-Recognize Credit Card Type: The "PAYMENT INFO" section has a "Credit Card Number" field with a Visa logo icon.

3. Big Payment Option Buttons: Two large buttons are shown: "SINGLE PAYMENT OF \$4,997" (selected with a green checkmark) and "3 PAYMENTS OF \$1,800".

4. Auto-Fill Shipping Information: The "BILLING INFORMATION" section is filled out with "Stanberry Everest" and "stan@berryeverest.com". The "SHIPPING INFORMATION" section is auto-filled with the same address: "1260 S. Spectrum Blvd", "Chandler", "AZ", "85286", "United States". A "Change Shipping Address" link is visible.

5. Secure Transaction Notice: A green button says "Complete my purchase!". Below it, a lock icon and text state "Payment secured by 256-bit encryption".

6. Add a Link to Terms & Disclaimers: A link "Have a coupon code?" is visible in the "ORDER SUMMARY" section.

7. Modern & Mobile Responsive Design: The form is shown on a laptop, tablet, and smartphone, demonstrating its responsive design.

8. No API Integration Needed: The footer shows "Copyright © 2015 Mel Abraham. All Rights Reserved. Terms, Privacy, & Disclaimers." and the "spiffy" logo.

6. Add a Link to Terms & Disclaimers

Easily create a link to your Terms & Disclaimers without having to code it in! Your order forms aren't FTC compliant without this on your order form.

7. Modern & Mobile Responsive Design

Spiffy's sleek and modern design is mobile responsive and looks great on all mobile devices. Give your order forms a makeover without knowing a line of code!

8. No API Integration Needed

Your transactions still take place in Infusionsoft so no need to rebuild your order forms or setup some crazy API integration. All of your data is in one place and all of your marketing & sales automation will work without having to hack systems together.

+ Much, Much More

There are dozens of other things Spiffy does behind the scenes to make your order forms more efficient and effective. We are consistently adding new features.
